

Gallatin Gateway School Academic Field Trips

Each year students participate in field trips, which culminate their studies. Field trips provide students a sense of realism that cannot be obtained from books. Students' appreciation of art, history, languages, geography and other cultures is greatly enhanced. Exploring new horizons sparks new interest including future career goals. Thank you to our community for the continued fundraising support, which allows Gallatin Gateway School children to travel away from the school to learn about the world.
